

HazCom – GHS Quiz

Name: _____ Date: _____

1. What does GHS stand for?
 - a. **The Globally Harmonized System of Classification and Labeling of Chemicals.**
 - b. The Global Health and Safety Standard.
 - c. The Geological Health Standard.
 - d. The Global Health Standard.

2. What do we know about GHS?
 - a. It is a regulation passed by OSHA.
 - b. It is an old standard revived by OSHA.
 - c. **It is a system adopted by OSHA under the HazCom Standard.**

3. The primary benefit of aligning the HCS to the GHS is to increase the quality and consistency of:
 - a. The amount of chemicals that can be manufactured and distributed.
 - b. The enforcement ability of OSHA compliance officers.
 - c. **The information provided to workers, employers and chemical users.**

4. Under HazCom, who is responsible for classifying chemicals manufactured or distributed?
 - a. Employers who purchase them.
 - b. Employees who use them.
 - c. **Chemical manufacturers and importers.**

5. Under GHS, hazard classification attempts to place chemicals in three major classes. They are:
 - a. **Physical hazards, health hazards and environmental hazards.**
 - b. General hazards, special hazards and unique hazards.
 - c. Consumer hazards, workplace hazards and public hazards.

6. GHS uses a system to place all of the physical, health and environmental hazards into major areas of classification, represented by pictograms. How many pictograms are there?
 - a. Five.
 - b. Seven.
 - c. **Nine.**
 - d. Twelve.

7. Under GHS, if you know which pictogram is used to characterize a chemical, what might you be able to conclude about that chemical?
- Whether it is acutely toxic or has properties.
 - Whether it is flammable or explosive or has other properties.
 - You cannot conclude anything.
 - A and/or B.**
8. What do we know about GHS label requirements?
- There is no standard format, just required elements.**
 - There are 19 required elements.
 - There are only 3 required elements.
9. Labels under GHS:
- Are the same as always.
 - Are standardized and harmonized.**
 - Are the same for all sectors/target audiences.
 - Will change significantly in 2017.
10. Under GHS, the core information required for labels includes:
- Ideas, Regulations and Concepts.
 - Signal words, Hazard Statements and Symbols.**
 - Job Hazard Analysis and Rigorous testing.
 - All of the above.
 - None of the above.
11. Under GHS, signal words include:
- Danger, Warning & Caution
 - Danger and Caution
 - Danger and Warning**
 - Warning and Caution
12. The SDS under GHS:
- Is the exact same as OSHA's current MSDS.
 - Varies from the MSDS and will require updates.**
 - Is not intended to replace the MSDS.
 - All of the above.

13. Section 1 of the GHS revised SDS is focused on:

- a. Identification of the substance or mixture and of the supplier.
- b. The PEL/TLV limits.
- c. Whether or not the substance is flammable.
- d. First aid measures in case of exposure.

14. Section 4 of the GHS revised SDS is focused on:

- a. Identification of the substance or mixture and of the supplier.
- b. The PEL/TLV limits.
- c. Whether or not the substance is flammable.
- d. First aid measures in case of exposure.
